Winka Dubbeldam in Berlin Exhibition

Miller Professor and Chair of Architecture [Winka Dubbeldam](#)'s firm [Archi-Tectonics](#) is the subject of a new exhibition, "[FlatLands & Massive Things - From NL to NYC & Beyond](#)," at the Aedes Architecture Forum in Berlin, Germany.

Opening March 15 and on view through April 25, the exhibition offers insight into the firm's methodology, combining state-of-the-art digital technologies with nuanced philosophical approaches. It will also highlight Dubbeldam's geographic influences as a Dutch-American architect.

Archi-Tectonics has built several commercial spaces, such as the 'Ports1961' stores in Paris, London, and Shanghai. New York City projects include the Gear magazine offices (1999), the Duggal Digital Headquarters (2000), the Netherlands Board of Conventions and Tourism (2009), the Moooi Headquarters (2015), and more recently Inscape, a new Meditation Studio (2017). In 2018 Archi-Tectonics won the [Asian Games Sports Park Competition](#) for two stadiums, a shopping mall, a fitness- and a visitor center as well as a vast landscape park for the 2022 Hangzhou Asian Games, China.
